

Assignment Apr 16 2021

Friday, April 16, 2021 9:09 AM

Assignment 01 — Create a star rating component

- It should display a rating using 5 Stars
- Examples

```
<star-rating rating='5' />
```

```
<star-rating rating='4' />
```

```
<star-rating rating='3.8' />
```

```
<star-rating rating='4.5' />
```

- The rating may be out of 100 (e.g. rotten tomato) or out of 10 (IMDB)
- They must be converted to 5 star. The max value should be passed as an optional attribute

```
<star-rating rating='9' max='10' />
```

```
<star-rating rating='9' max='100' />
```

- When we hover over the star it should show the value as 4/5 or 9/10 etc

- Display star rating component for each of the books in the book list page.

Assignment 2

- Integrate your book-api-server-m3 with books-web-ajax-client
- Currently we have tested our server with postman.
- Currently our client is using json-server
- Now connect the client to books-server-m3
- The client should include star rating component
